

NFPA CODE #	NFPA TITLE	SCOPE OF DOCUMENT
NFPA 1	Uniform Fire Code	Covers the prevention of fire and explosion through the regulation of conditions that could cause fire or explosion and panic resulting therefrom.
NFPA 101	Life Safety Code	Deals with life safety from fire and like emergencies. Covers construction, protection and occupancy features to minimize danger to life from fires, smoke, fumes or panic before buildings are vacated.
NFPA 105	Recommend Practice for the Installation of Smoke-Control Door Assemblies	Covers the use of door assemblies in openings where the passage of smoke is to be governed.
NFPA 232	Standard for the Protection of Records	Provides requirements for records protection equipment and facilities and record-handling techniques that provide protection from the hazards of fire.
NFPA 801	Standard for Fire Protection for Facilities Handling Radioactive Materials	Deals with practices aimed at reducing the risks of fires and explosions at facilities handling radioactive materials and provides requirements for personnel responsible for the design or operation of facilities that involve the storage, handling, or use of radioactive materials.
NFPA 14	Standard for the Installation of Standpipe, Private Hydrants, and Hose Systems	Covers the minimum requirements for the installation of standpipe and hose systems for buildings and structures.
NFPA 1962	Standard for the Care, Use, and Service Testing of Fire Hose Including Couplings and Nozzles	Covers care of all types of fire hose and coupling assemblies while in service, in use, and after use; including record keeping, inspecting, and service testing.
NFPA 55	Standard for the Storage, Use, and Handling of Compressed and Liquefied Gases in Portable Cylinders	Applies to the storage, use and handling of compressed and liquefied gases in portable cylinders in all occupancies.
NFPA 75	Standard for the Protection of Electronic Computer/Data Processing Equipment	Covers requirements for installations of electronic computer/data processing equipment.
NFPA 80	Standard for Fire Doors and Fire Windows	Covers the installation and maintenance of fire door assemblies, windows, glass blocks, and shutters for the protection of openings to restrict the spread of fire and smoke within buildings, whether from interior fire or from external fire, including arrangements for automatic operation in case of fire.
NFPA 30	Flammable & Combustible Liquids Code	Applies to all flammable and combustible liquids except those that are solid at 100oF or above. Covers tank storage, piping, valves and fittings, container storage, industrial plants, bulk plants, service stations and processing plants.
NFPA 20	Standard for the Installation of Stationary Pumps for Fire Protection	Covers minimum requirements for the selection and installation of pumps supplying water for private fire protection.
NFPA 1963	Standard for Fire Hose Connections	Covers the dimensions for screw thread connections, gages, gaskets, gasket seats, and the size thread of threaded connections specified herein.
NFPA 70E	Standard for Electrical Safety Requirements for Employee Workplaces	Covers protection to the employee from electrical hazards such as shock, arc blasts and explosions initiated by electricity.
NFPA 115	Recommended Practice on Laser Fire Protection	Covers minimum fire protection criteria for the design, manufacture, installation and use of lasers and associated equipment. This includes criteria for responding to fire emergencies involving lasers.
NFPA 82	Standard on Incinerators and Waste and Linen Handling Systems Equipment	Covers basic requirements primarily concerned with fire hazards encompassing the installation and use of incinerators, waste handling systems, linen (laundry) handling systems, compactors, and waste storage rooms and containers.
NFPA 1600	Standard for Disaster/Emergency Management and Business Continuity Programs	This standard shall establish minimum criteria for disaster management and provide guidance to the private and public sectors in the development of a program for effective disaster preparedness response and recovery.
NFPA 53	Recommended Practice on Materials, Equipment and Systems Used in Oxygen-Enriched Atmospheres	Covers the fire and explosion hazards that may exist in oxygen enriched atmospheres.
NFPA 101A	Guide to Alternative Approaches to Life Safety	Consists of a number of different system approaches to life safety.
NFPA 12A	Standard on Halon 1301 Fire Extinguishing Systems	Covers minimum requirements for Halon 1301 fire extinguishing systems for the use and guidance of those charged with the purchasing, designing, installing, testing, inspecting, approving, listing, operating and maintaining such systems.
NFPA 58	Liquefied Petroleum Gas Code	Applies to the highway transportation of LP-Gas and to the design, construction, installation and operation of all LP-Gas systems.
NFPA 85	Boiler and Combustion Systems Hazards Code	This code shall apply to the design, installation, operation, training, and maintenance as they relate to safety of combustion systems. It shall apply to single burner boilers, multiple burner boilers, and atmospheric fluidized bed boilers with a fuel input rating of 12,500,000 Btu/hr (3663 kW) or greater and shall apply to stokers with a minimum fuel input of 400,000 Btu/hr (117 kW), to pulverized fuel systems, and to fired or unfired steam generators used to recover heat from combustion turbines (HRSG's). This code shall cover strength of the structure, operation and maintenance procedures, combustion and draft control equipment, safety interlocks, alarms, trips, and other related controls that are essential to safe equipment operation.
NFPA 45	Standard on Fire Protection for Laboratories Using Chemicals	Applies to laboratories in which hazardous chemicals are handled or stored.
NFPA 92A	Recommended Practice for Smoke-Control Systems	Covers the design, installation, testing, operation and maintenance of new and retrofitted mechanical air conditioning and ventilation systems for the control of smoke.
NFPA 92B	Guide for Smoke Management Systems in Malls, Atria, and Large Areas	Provides technical data relevant to the design, installation, testing, operation, and maintenance of new and retrofitted smoke management systems in buildings having large volume spaces for the management of smoke within the space where the fire exists or between spaces not separated by smoke barriers.
NFPA 96	Standard for Ventilation Control and Fire Protection of Commercial Cooking Operations	Covers requirements for the design, installation and use of exhaust system components.
NFPA 70	National Electrical Code®	Covers electric conductors and equipment installed within or on public and private buildings or other structures, including mobile homes and recreational vehicles, floating buildings; and other premises such as yards, carnivals, parking and other lots and industrial substations; conductors that connect the installations to a supply of electricity; and other outside conductors and equipment on the premises; optical fiber cable; buildings used by the electric utility, such as office buildings, warehouse, garages, machine shops, and recreational buildings that are not an integral part of a generating plant, substation, or control center.
NFPA 780	Standard for the Installation of Lightning Protection Systems	This document covers lightning protection system installation requirements for: (a) ordinary structures; (b) miscellaneous structures and special occupancies; (c) heavy duty stacks; (d) water craft; or (e) structures containing flammable vapors, flammable gases, or liquids that can give off flammable vapors.
NFPA 50	Standard for Bulk Oxygen Systems at Consumer Sites	Covers the general principles recommended for the installation of bulk oxygen systems on consumer premises where the supply to the consumer premises originates outside the consumer premises and is delivered by mobile equipment.
NFPA 99	Standard for Health Care Facilities	Covers criteria to minimize the hazards of fire, explosion, and electricity in health care facilities
NFPA 99B	Standard for Hypobaric Facilities	Covers the recognition of, and protection against, hazards of an electrical, explosion, and implosion nature, as well as fire hazards.
NFPA 600	Standard on Industrial Fire Brigades	Covers the organizing, operating, training, and equipping of private fire brigades.
NFPA 25	Standard for the Inspection, Testing, and Maintenance of Water-Based Fire Protection Systems	This document establishes the minimum requirements necessary for the inspection, testing and maintenance of water extinguishing systems. These systems include sprinklers, standpipe and hose, fire service piping and appurtenances, fire pumps, water storage tanks, fixed water spray, foam-water, and valves. The document also addresses impairment handling and reporting
NFPA 31	Standard for the Installation of Oil-Burning Equipment	Covers minimum requirements for safety to life and property from fire in the installation of oil burners and the equipment used in connection with them.
NFPA 110	Standard for Emergency and Standby Power Systems	Covers performance requirements for power systems providing an alternate source of electrical power to loads in buildings and facilities in the event that the normal power source fails.
NFPA 111	Standard on Stored Electrical Energy Emergency and Standby Power Systems	Covers performance requirements for power systems providing an alternate source of electrical power to loads in buildings and facilities in the event that the normal power source fails.
NFPA 170	Standard for Fire Safety Symbols	The scope provides referents and symbols for visual alerting of building occupants during fire and related life safety emergencies; presents fire protection symbols for the architectural, engineering, and allied design fields; presents fire protection symbols for diagrams employed in fire risk and loss analysis; presents standard referents and symbols for visual alerting of fire fighters during fire and related emergencies.
NFPA 5000	NFPA Building Construction and Safety Code	Provide minimum design regulations to safeguard life and limb, health, property, and public welfare by regulating and controlling the permitting, design, construction, quality of materials, use and occupancy, location, and maintenance of all buildings and structures within the jurisdiction and certain equipment specifically regulated herein.
NFPA 101B	Code for Means of Egress for Buildings & Structures	Identifies the minimum criteria for the design of egress facilities so as to permit prompt escape of occupants from buildings or, where desirable, into safe areas within buildings.
NFPA 220	Standard on Types of Building Construction	Defines standard types of building construction and the terms "limited combustible," and "non-combustible," as applied to building construction materials.
NFPA 221	Standard for Fire Walls and Fire Barrier Walls	Specifies requirements for the design and construction of fire walls and fire barrier walls.
NFPA 54	National Fuel Gas Code	Applies to the installation of fuel gas piping systems, fuel gas utilization equipment, and related accessories.
NFPA 90A	Standard for the Installation of Air-Conditioning and Ventilating Systems	Covers all systems for the movement of environmental air in structures, which (a) serve spaces of over 25,000 cubic feet in volume, or (b) serve buildings of Types III, IV and V construction over three stories in height, regardless of volume, or (c) serve buildings and spaces not covered by other applicable NFPA standards (d) serve occupants or processes not covered by other applicable NFPA standards.
NFPA 90B	Standard for the Installation of Warm Air Heating and Air-Conditioning Systems	Covers all systems for the movement of environmental air in structures which serve one- or two-family dwellings or serve spaces not exceeding 25,000 cubic feet in volume in any occupancy.
NFPA 318	Standard for the Protection of Semiconductor Fabrication Facilities	Provides reasonable safeguards for the protection of facilities containing cleanrooms from fire and related hazards. These safeguards are intended to provide protection against injury, life loss, and property damage.
NPFA 70B	Recommended Practice for Electrical Equipment Maintenance	Covers preventive maintenance for industrial type electrical systems and equipment.
NFPA 72	National Fire Alarm Code®	Deals with the the application, installation, performance, and maintenance of protective signaling systems and their components.
NFPA 77	Recommended Practice on Static Electricity	Covers methods for control of static electricity for the purpose of eliminating or mitigating its fire hazard.
NFPA 418	Standard for Heliports	Covers roof-top heliport construction and protection.
NFPA 901	Standard Classifications for Incident Reporting and Fire Protection Data	Identifies a common international language for the description of fire incidents and method for classifying fire protection data.
NFPA 10	Standard for Portable Fire Extinguishers	Covers the selection, installation, inspection, maintenance, and testing of portable extinguishing equipment.
NFPA 37	Standard for the Installation and Use of Stationary Combustion Engines and Gas Turbines	Covers the installation and operation of stationary combustion engines and gas turbines. Also covers portable engines which remain connected for use in the same location for a period of one week or more and which are used instead of or to supplement stationary engines.
NFPA 704	Standard System for the Identification of the Hazards of Materials for Emergency Response	Applies to facilities for the manufacturing, storage or use of hazardous materials. It is concerned with the health, fire, reactivity and other related hazards created by short term exposure as might be encountered under fire or related emergency conditions.
NFPA 80A	Recommended Practice for Protection of Buildings from Exterior Fire Exposures	Covers the protection of combustibles within and on the exterior of an exposed building.
NFPA 13	Standard for the Installation of Sprinkler Systems	Covers minimum requirements for the design and installation of automatic sprinkler systems and of exposure protection sprinkler systems including the character and adequacy of water supplies to sprinkler systems.
NFPA 472	Standard for Professional Competence of Responders to Hazardous Materials Incidents	Covers the requirements for first responder, hazardous materials technician, and hazardous materials specialist.
NFPA 560	Standard for the Storage, Handling, and Use of Ethylene Oxide for Sterilization and Fumigation	Applies to the storage and handling of ethylene oxide in portable containers and its use at sterilization and fumigation facilities. It shall also apply to flammable mixtures of ethylene oxide with other chemicals.
NFPA 1961	Standard for Fire Hose	Covers design, and design verification testing of new fire hose, specified as attack hose, rack and reel hose, forestry hose, and supply hose.
NFPA 424	Guide for Airport/Community Emergency Planning	Covers airport/community emergency planning techniques and procedures and how to plan for utilization of personnel from all concerned departments and agencies to provide maximum aircraft emergency services.
NFPA 17	Standard for Dry Chemical Extinguishing Systems	Covers minimum requirements for dry chemical fire extinguishing systems which discharge dry chemical from fixed nozzles or hand hose lines by means of expelling gas.
NFPA 17A	Standard for Wet Chemical Extinguishing Systems	Covers the design, installation, operation, testing and maintenance of wet chemical pre-engineered fire extinguishing systems which discharge wet chemical from fixed nozzles and piping by means of expellant gas.
